

Regional System Facilities Plan - Draft Plan

Advancing Waste Reduction, Access and Affordability

The plan is a comprehensive, long-term vision and strategy for investing in reuse, recycling and garbage facilities and infrastructure across the region. The plan aims to reduce waste sent to landfills, increase access to facilities and services, and keep costs affordable.

People in greater Portland need better access to services in our reuse, recycling and garbage system. Beyond curbside collection, people need convenient and affordable ways to get rid of large items and hazardous waste. Today, some people have easy disposal options if they live close to a Metro transfer station, but many people in the region do not. And as the region grows, more investment is needed to ensure that everyone, no matter where they live, has equal access to reuse, recycling and garbage services.

Plan Benefits

Over 100,000 more tons of waste recovered per year

Up to 98% of people will live near a depot

Easier access for hard to recycle or dispose of items

Increased investment in public-private partnerships

Key Investments

Community drop-off depots

Building six new depots for reuse, recycling, hazardous waste, compost and self-haul garbage services

Reuse and repair

Funding local reuse and repair businesses and building a regional reuse warehouse and a reuse mall

Organics

Converting Metro Central into a regional hub for food waste and yard debris and investing in local private organics facilities

Commercial transfer stations

Partnering with private facilities to provide more infrastructure for garbage from commercial haulers

Many voices shaped the plan

Metro engaged with city, county and tribal governments, community groups, solid waste businesses and reuse organizations throughout every phase of the Regional System Facilities Plan. Engagement opportunities included meetings, roundtables, workshops and a symposium at which diverse partners identified preferred scenarios for facility investments across the region.

Metro also convened a community advisory group to help guide development of the plan. Members were chosen for their unique perspectives and connections to communities as well as their interest and experience in advancing environmental justice.

Comment on the draft plan

The draft plan is available on the Metro website with a comment period open until Nov. 6. You can share your feedback online, by mail, email, or phone. A survey will also be offered.

Additionally, Metro encourages public testimony when the Metro Council reviews the final plan for adoption in late 2024.

Visit the project website oregonmetro.gov/facilitiesdraftplan for the survey and other comment options.
